Allowable Subject Matter

Claims 11, 13 and 15-18 are allowed.

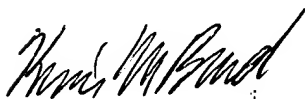

The following is an examiner's statement of reasons for allowance: The instant application's disclosed prior art discloses a method for performing a mobile communication signal search using a multipath signal searcher in a CDMA wireless communication system (page 3, lines 5-7). The searcher includes a plurality of paths (page 1, lines 12-25) time offsets are assigned to specific groups across a search window as shown in figures 1 and 2. A search metric is accumulated over these groups (page 3, lines 5-21). Figures 1 and 2 show the searching of these groups over the same time period. The groups contain odd and even time offsets but the groups do not disclose the first group of time offsets comprise only even time offsets and the second group of time offsets comprise only odd time offsets as stated in claims 11, 13 and 15-18. Ziv et al (US 5,710,768) discloses using search offsets in windows as stated in the abstract. Ziv also discloses grouping even and odd offsets in buffers (figure 5) but Ziv does not provide enough detail about how the searching takes place.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
